## DELICATE CACTUS DAHLIAS

*Everyone a Prize Winner*

Be the first in your neighborhood to grow these exciting new Cactus Dahlias which have been developed to a high state of perfection by Holland's famous Dahlia experts. The petals are pointed (hence the name "cactus") and gracefully twisted and curled, making the blossoms especially effective for table decoration and other floral arrangements. The varieties listed here have been selected for their superior qualities as cut flowers and garden plants.

**Beaute.** Clear yellow.  
**Garden Jewel.** Bronze.  
**Pastorale.** Lighter bronze.  
**Sensation.** Violet.  
**Snow.** Pure white.  
**Your Lucky Star.** Rich pink with light center. Very large.

### Outstanding Cut Flower

## ST. THERESE (Cactus)

Exquisitely formed flowers of glowing pink with white centers. This is one of the earliest flowers to bloom in the garden and the strong bushes are covered with a profusion of blooms until frost. We grew over 2 acres of ST. THERESE last year and sold more cut flowers of this variety than of all others in our entire planting.

## GIANT DECORATIVE DAHLIAS

*Outstanding Garden Favorites*

Here is a selection of proven varieties of the very popular giant flowered decorative Dahlias. Like all Dahlias they are easily grown, and each one will produce a strong, healthy bush with many flowers 6 to 10 inches across. A planting of these magnificent Dahlias will make your garden the show place of the neighborhood.

**Avalon.** Fine clear yellow.  
**Charles L. Mastick.** Orange to bronzy orange.  
**Deuil du Roi Aibert.** Purple tipped white.  
**Elinor Francis.** Scarlet red.  
**Gallant Fox.** Bright ruby red.  
**Golden Eclipse.** Rich golden yellow.  
**Le Toreador.** Vivid "raspberry red."  
**Margaret Cole.** Orange yellow tipped white.  
**Mrs. Kunzman.** Delightful combination of tan and bronze.  
**Rose Glory.** Deep rose. Excellent stems and dark foliage.  
**Salbach's White.** White, good cut flower.  
**Thos. Edison.** Rich royal purple, outstanding.

**ONLY**  
**50c EACH**  
**12 FOR \$4.50**

**Sensational**  
**New Cactus Dahlia**

## GENERAL EISENHOWER

This new prize winning Dahlia has created a sensation wherever seen. The large ruby red flowers are held erectly on strong cane-like stems and have been known to last as long as 10 days in water. The bushes will often have as many as 10 to 15 flowers open at one time. Named by the Belgians in honor of our great wartime general. We consider this one of the best Dahlias we have ever grown.

**Strong No. 1 Tubers**

**\$2.00 EACH; 3 FOR \$5.00**

**Offered for the First Time at This Low Price**

*Dahlias will produce an abundance of bloom from July until frost.*

*The more you cut them the more they bloom.*

*No other flower will give such truly fine results with so little effort.*

## LOVELY MINIATURE DAHLIAS

Now you can have all the beauty of color and form found in the popular large flowered cactus and decorative Dahlias in blooms of a size especially suited for strikingly beautiful floral arrangements for your home. Miniature Dahlias produce a host of blooms 3 to 4 inches across on well branched bushes, making them ideal for garden decoration also. The 12 varieties listed here include a wide range of colors in both the cactus and decorative types.

### Miniature Decorative

**Alice Baker.** Clear lemon yellow.  
**Buckeye Baby.** Bronze. Tall bush.  
**Dolly.** Lavender, tall bush.  
**Fairy.** Pink, often called the miniature Jersey Beauty.  
**Springhill Rose.** American Beauty red.  
**White Fawn.** Snow white blooms on dense bushes.

### HOW TO GROW DAHLIAS

Planting and Culture	Dahlias will grow in any ordinary garden soil, but superior flowers can be produced with a little extra care. The ground should be in a moist growing condition at all times, especially during the blooming season. After all danger of frost is past, plant the tubers in an open sunny location in holes four to six inches deep and two to three feet apart, either in rows or in mass effects. If stakes are used for name tags and support later on, they should be set at planting time. Cover the tubers with about two inches of soil and fill in as the sprout grows. To avoid too tall a bush pinch out the top of the plant just under the first set of leaves when five or six side branches have appeared. Water every week, soaking the ground thoroughly.
Fertilizer	Bone meal may be mixed with the soil in the hole at planting time — a small cupfull to each plant. Commercial fertilizers may be used — rather sparingly — about every three weeks during the flowering season, but be sure the dust does not get closer than four inches to the stalk. Immediate watering is advised. Cow or sheep manures are good, especially for the humus content, but not horse manure.
Insect Control	Insects on dahlias can be easily controlled by using DDT for thrips, leaf hoppers and cucumber or 12 spotted beetles. Any insecticide with a nicotine base can be used for aphids. Follow directions on the package. For red spider use parathion, either spray or dust.
Cut Flowers	Dahlias should be cut when the blooms are fully matured because they do not open out in water. An immature flower will wilt and one too old will shatter. Pick them late at night or early in the morning, using a sharp knife to make a slanting cut. Put them into deep cold water and let them stand several hours before arranging. Scrape the stems for about 5 to 6 inches at the base or dip the stems in very hot water for a minute or two. This will make the flowers last longer.
Digging and Storing	Late in the fall, usually after a frost, cut the bushes off close to the ground. Dig the clumps carefully, making sure the roots are not broken away from the stalk or the necks are not twisted or broken. Trim off the stalk as close to the clump as possible. Store the clumps in crates or barrels in a place free from frost, but not so dry that tubers will shrivel. A good rule to follow for storing is to keep them as you would potatoes. Divide the clumps at planting time after the eyes or sprouts are easily seen. Never plant the whole clump. This will make a cluster of weaker bushes instead of one strong plant.
